

Brainstorming & Idea Prioritization Template

Date	08 October 2026
Team ID	UNM1611BHAVANA
Project Name	AI FitTrack API
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Bhavana	Secure user registration and login using JWT	Security	1
2	Bhavana	Personal profile with age, weight, height and fitness goal	User Management	1
3	Thejasri	Log workouts (type, duration, sets, reps, calories burned)	Activity Tracking	2
4	Thejasri	Daily meal and water intake logging	Activity Tracking	2
5	Tamilvanan	AI-generated personalised workout plans based on goals	AI Features	3
6	Tamilvanan	AI diet and calorie suggestions from logged data	AI Features	3
7	Vasigaran	Weekly and monthly progress reports and statistics	Reporting	4
8	Vasigaran	Goal setting with streaks and achievement milestones	Reporting	4
9	Bhavana	Role-based access (user and admin) for managing data	Security	1
10	Thejasri	Wearable / health-app data import through REST endpoints	Integration	5
11	Tamilvanan	Validation and centralised error handling for all requests	Quality	6
12	Vasigaran	Automated API tests and Postman collection for evaluators	Quality	6

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Secure authentication, user profiles and role-based access	High	High	1	Yes
2	Workout, meal and water activity logging (CRUD APIs)	High	High	2	Yes
3	AI-based workout and diet recommendations	Medium	High	3	Yes
4	Progress reports, statistics, goals and streaks	High	Medium	4	Yes
5	Wearable / health-app data import	Low	Medium	6	No
6	Validation, error handling, automated tests	High	High	5	Yes

Priority 1 = highest. Wearable import is kept as future scope because it depends on third-party device APIs.
