

Project Initialization and Planning Phase

Date	08 October 2026
Team ID	UNM1611BHAVANA
Project Name	AI FitTrack API
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

A customer problem statement captures the customer's point of view so the team can build a solution that addresses what actually matters to them. The statements below describe the main users of the AI FitTrack API.

Example (filled for this project):

I am	I'm trying to	But	Because	Which makes me feel
A fitness enthusiast who works out regularly	Track my workouts, meals and progress in one place	My data is scattered across notebooks and apps, with no personal guidance	Generic plans ignore my goals, body stats and logged history	Frustrated and unsure whether I am improving

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A fitness enthusiast who works out regularly	Log workouts, meals and water intake and see my progress	My records are scattered across notebooks and several apps	There is no single, secure system that stores my activity history	Frustrated and unsure whether I am improving
PS-2	A beginner who wants to get fit	Get a workout and diet plan that suits my goal and body stats	Generic online plans do not match my age, weight or fitness level	Personalised guidance usually needs a paid trainer	Overwhelmed, but hopeful with a plan made for me
PS-3	A mobile or web app developer	Add fitness tracking and AI recommendations to my own app	I would have to build authentication, storage and AI logic from scratch	There is no ready, well-documented REST API for fitness data	Relieved and productive when I can plug in a reliable API
