Empathy Map

The empathy map below describes the primary user of the AI FitTrack API from four perspectives: what they say, think, do and feel in relation to tracking their fitness.

SAYS • "I never remember what I lifted last week." • "I want a plan that fits my goal, not a generic one." • "Can I see how much I have improved this month?"	THINKS • "Am I eating and training correctly for my goal?" • "Is my personal health data safe?" • "Will I stay motivated if I can't see results?"
DOES • Writes workouts in notes or uses several separate apps • Searches online for workout and diet plans • Skips logging when it takes too much effort	FEELS • Frustrated by scattered, incomplete records • Unsure and anxious about progress • Motivated and proud when progress is visible

ARJUN
*Regular
gym-goer /
fitness app
user*

Persona name is illustrative and represents the typical end user of an app built on the AI FitTrack API.
