

Project Demo Planning

Date	08.10.2026
Team ID	UNM1611BHAVANA
Project Name	AI FitTrack API
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Introduce AI FitTrack API and the need for AI-assisted workout tracking and fitness insights.	2	Bhavana
2	Solution Overview & Architecture	Explain the Node.js / Express backend, MongoDB models, JWT middleware and the Gemini AI service layer (src/ folder structure).	3	Thejasri
3	Setup & Server Start	Run npm install and npm start; show Server running on port 5000 and MongoDB Connected: localhost.	2	Vasikaran
4	Authentication Demo	Register and log in through the API client; show the JWT token and the protected profile route (Figure 1).	3	Tamilvanan
5	AI Features Demo	Call workout-recommendation and fitness-insights; show the 200 response and the 400 validation message (Figure 2).	4	Bhavana, Thejasri
6	Conclusion & Q&A	Summarise features, limitations and future scope; answer questions.	3	All members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Project name, team members and objective of the API.
2	Solution Overview	Architecture: routes, controllers, models, middleware, services (geminiService.js), config.
3	Live Feature Demonstration	Run the server, test endpoints with the Postman/API client using FitTrack.postman_collection.json (screenshots below).
4	Q&A Session	Open discussion with evaluators; refer to the Scalability & Future Plan document.

Live Demonstration Reference:

POST http://localhost:5000/api/auth/login

JSON Content

```
1 {
2   "name": "swapna",
3   "email": "user2@gmail.com",
4   "password": "password123"
5 }
```

Status: 201 Created Size: 281 Bytes Time: 782 ms

Response

```
1 {
2   "success": true,
3   "token": "eyJhbGciOiJIUzI1NiIsInR5cCI6IkpXVCJ9.eyJpZiZCI6IjZlOTFjYWE5MDhhMTQzMzIiNDYxYjg5MCI6Im1ldCI6MTc4NzszOTQ5OCwiZXhwIjoxNzkwNTMxNDk0fQ.R0hSw",
4   "user": {
5     "id": "6a91caa908a1463fb461b810"
6   }
7 }
```

Terminal

```
PS D:\VM PROJECT FILES\VM - project code files\CODE> npm install
Run 'npm audit' for details.
PS D:\VM PROJECT FILES\VM - project code files\CODE> npm start
> ai-fittrack-api@1.0.0 start
> node src/server.js

Server running in development mode on port 5000
MongoDB Connected: localhost
POST /api/auth/register 201 252.916 ms - 281
```

Demo step 4 – Authentication: register / login and JWT token response.

POST http://localhost:5000/api/ai/fitness-insights

JSON Content

```
1 {
2   "totalWorkouts": 3,
3   "averageDuration": "1 hour",
4   "totalCaloriesBurned": req.body
5 }
```

Status: 400 Bad Request Size: 98 Bytes Time: 17 ms

Response

```
1 {
2   "success": false,
3   "error": "Please provide totalWorkouts,
4     averageDuration, and totalCaloriesBurned"
5 }
```

Terminal

```
PS D:\VM PROJECT FILES\VM - project code files\CODE> npm start
> node src/server.js

Server running in development mode on port 5000
MongoDB Connected: localhost
POST /api/auth/register 201 252.916 ms - 281
POST /api/auth/login 200 206.882 ms - 281
GET /api/auth/profile 200 12.454 ms - 99
POST /api/ai/workout-recommendation 200 7777.610 ms - 1562
POST /api/ai/fitness-insights 400 9.435 ms - 98
```

Demo step 5 – AI endpoints: fitness-insights validation and server request log.
