Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Bhavana
Overall Team Coordination Rating (1-5)	5
Any issues during demo	The fitness-insights request returned 400 Bad Request because required fields (totalWorkouts, averageDuration, totalCaloriesBurned) were missing or sent in the wrong format; the AI workout-recommendation call also took about 7.8 seconds.
How issues were resolved	The request body was corrected using the fields listed in the API error message, and the delay was explained as the external AI response time. The team confirmed all requests in the Postman collection before the final demo.
