

Coding & Solution

Date	08 October 2026
Team ID	UNM1611BHAVANA
Project Name	AI FitTrack API
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of the implemented code and the overall solution. The AI FitTrack API demonstrates working functionality, clean code practices and alignment with the defined requirements.

Solution Summary

Field	Details
Repository Link / URL	To be added - GitHub / GitLab repository URL
Programming Language(s)	JavaScript (Node.js)
Framework(s) Used	Express.js, Mongoose (MongoDB ODM)
Key Features Implemented	- User registration and login (JWT) - Profile management - Workout tracking (CRUD) - Nutrition and calorie tracking - Goal management - AI workout and diet recommendations - Progress summaries - Input validation and centralized error handling
Pending / Incomplete Features	Cloud deployment, Docker containerization, front-end client and wearable-device integration (future scope)
Setup / Run Instructions	1. Install Node.js, npm and MongoDB. 2. Run: npm install 3. Copy .env.example to .env and set PORT, MONGO_URI and JWT_SECRET. 4. Start MongoDB. 5. Run: npm start (or node server.js). 6. Test the endpoints in Postman at http://localhost:PORT.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes

S.No	Criteria	Status (Yes / No)
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The API is built for local evaluation. The evaluator must configure the .env values and a MongoDB connection using .env.example before running. Team members: BHAVANA, THEJASRI, VASIKARAN, TAMILVANAN.
